

## 80R2 / 80R6 Series

80R2 / 80R6 — planar magnetics in the Off-line active clamp forward, dual output topology.

### Key features & specifications

|             |                                            |
|-------------|--------------------------------------------|
| Topology    | Off-line active clamp forward, dual output |
| Power range | 100–350 W · 100–360 W                      |
| Input       | 180–400 V in (AC off-line)                 |
| Controller  | LT3752-1                                   |

Optimized for isolated converters with synchronous rectification. Planar construction, low profile, and windings that can be embedded in the converter main PCB.
